DEAR FRIENDS,

Since 2006, Philanthropy Northwest has published biennial reports on grantmaking trends for our region — Alaska, Idaho, Montana, Oregon, Washington and Wyoming — based on the most recent data available from a combination of our membership network, Form 990s and intermediaries. These reports aim to reflect our collective giving, encourage more conversations and help inform your strategies.

For this sixth edition of Trends in Northwest Giving, we are presenting this report in collaboration with Foundation Center, which collects grants data reported by organizations across the Northwest and nationwide. This partnership enables us to tell a story based on a larger pool of funders, in three parts: key findings, based on a snapshot of $1.8 billion granted to our region by more than 4,000 funders in 2014; trends over time, based on a subset of 1,387 funders that reported data for both 2012 and 2014; and state-by-state variations.

HIGHLIGHTS FROM TRENDS IN NORTHWEST GIVING

• Northwest philanthropy is on the rise. Grantmaking to our region jumped more than 40% between 2012 and 2014, a complete reversal of the recession-related declines reported in the last two editions of this report.

• Place-based funding remains vital. Although this report now includes many more funders from across the country, eight of the top 10 funders are based in our region — a trend we also see in the individual state lists.

• Health and education receive the most support. Fueled by multimillion-dollar grants to research institutions, health is now the issue area receiving the largest share of philanthropic dollars to the Northwest. Close behind, education funding ranges from major gifts to universities to local grants for early childhood programs.

• Northwest funders look beyond programs. Project-related funding remains the most common grant type reported, but there has been a shift toward increased support for capacity-building, technical assistance, research and evaluation — helping nonprofits test and scale their work in our communities.

• Native communities inspire Northwest philanthropy. Within the narrow slice of grant dollars allocated for people of color, funding for Alaska Native and Native American communities in our six-state region accounted for 25% of the grant funding to Native populations nationwide.

Thank you to all the organizations that reported their grants to Foundation Center, and to our partners at Foundation Center for collecting and analyzing this vast pool of data. We invite you to share your thoughts on these trends and to visit philanthropynw.org/trends17 for more information.

Sincerely,

Audrey Haberman
Interim CEO, Philanthropy Northwest
KEY FINDINGS

Charitable foundations and corporations provide critical support to Northwest communities, awarding grants for a range of issue areas, support strategies and population types. This analysis examines philanthropic giving to our six-state region — Alaska, Idaho, Montana, Oregon, Washington and Wyoming — by a sample of 4,092 U.S. foundations and corporate funders that contributed a combined $1.8 billion through 46,965 grants in 2014.¹

1. **Family foundations contributed the majority of funds to the Northwest.**

Of the $1 billion in grant dollars to our region from family foundations in 2014, 51% represent the Bill & Melinda Gates Foundation’s support of activities and programs in Oregon and Washington.²

**Giving to the Northwest by Funder Type, 2014**

- **Family Foundations** 56%
- **Independent Foundations** 19%
- **Community Foundations** 10%
- **Public Charities** 8%
- **Corporate Funders** 8%
- **Total** $1B

1. Not including donations from the Bill & Melinda Gates Foundation.
2. This is the total amount given by family foundations, not specifically the Gates Foundation.
2. **Corporate support to the Northwest benefits from major national funders with strong local ties.** Corporate philanthropy accounted for 8% of giving to our region, totaling $152.1 million in 2014. Consistent with previous *Trends in Northwest Giving*, the largest contributions to our region came from Boeing and Microsoft, both Fortune 100 companies employing more than 120,000 people in Washington.

**Giving to the Northwest by Corporate Funders, 2014**

3. **Most grants made to our region were for less than $10,000.** Consistent with previous *Trends in Northwest Giving*, the median size of grants to the Northwest in 2014 was $5,000. Out of the pool of 39,890 grants analyzed for this report, more than 90% were for $100,000 or less — but accounted for just one-fourth of grant dollars to our region. In contrast, 44% of dollars came from just 176 grants of $1 million or more.

**Giving to the Northwest Region by Grant Size, 2014**

- Under $10K: 23,847 grants, total $100K to $500K
- $10K to $25K: 8,191 grants, total $25K to $50K
- $25K to $50K: 3,479 grants, total $50K to $100K
- $50K to $100K: 2,039 grants, total $50K to $100K
- $100K to $500K: 1,945 grants, total $100K to $500K
Health and education were top priorities for grantmaking to our region. Similar to national giving trends, more than half of grant dollars awarded to the Northwest were reported as funding for health (38%) and education (19%). The Bill & Melinda Gates Foundation made significant grants in these issue areas, both regionally and nationally, in 2014.

- The largest grant to the Northwest in 2014 was the Gates Foundation’s $156 million award to PATH — an international health organization based in Seattle — to accelerate the development of malaria vaccines.

Excluding the Gates Foundation, education received the largest proportion of grant dollars to the Northwest (22%), followed by health (18%). Higher education, including philanthropic gifts to universities, accounted for close to 50% of grant dollars awarded for education; more than one-third of dollars focused on K-12 funding, including strong support from place-based family foundations.

- The Ford Family Foundation awarded $2.6 million to The Oregon Community Foundation in support of its Out-of-School Time program.

- The Dennis & Phyllis Washington Foundation awarded a three-year $2.4 million grant to implement Montana’s EdReady Academic Readiness Curriculum for all ages.

Northwest without Gates | National without Gates
5. Program development accounted for the largest share of support type in 2014. Similar to national giving trends, U.S. foundations and corporate funders allocated the greatest proportion of grant dollars to activities described as program development ($850.6 million out of $1.8 billion), followed by funding for research and evaluation ($494.1 million).\(^8\)

Major grants for these larger categories came from both place-based and national funders, including a $625,000 grant from The JPMorgan Chase Foundation to the Seattle-King County Workforce Development Council for job creation and training support. In contrast, smaller categories may attract more local stakeholders, such as funding from Rasmuson Foundation and The Alaska Mental Health Trust Authority, through The Alaska Community Foundation, for the Recover Alaska initiative’s network-building and collaboration to reduce the harm caused by alcohol abuse.\(^9\)

Giving to the Northwest by Support Type, 2014
Native populations received higher percentage of grant dollars to the Northwest than nationwide. Consistent with national trends, the largest shares of philanthropic funding to our region in 2014 focused on supporting historically underserved communities. Within the narrow slice of grant dollars allocated for people of color, funding to the Northwest was nearly five times more likely than grantmaking nationwide to support Native activities, issues and communities.

Significant grants for Native communities included a five-year $5 million award from Rasmuson Foundation to the Alaska Native Science and Engineering Program at the University of Alaska Anchorage.

Giving to the Northwest by Population Type, 2014
Ten funders contributed more than half of all grant dollars to our region.

Grants made by the top 10 funders to the Northwest — including five based in King County, Washington — accounted for more than half of total giving to the Northwest in 2014. Consistent with previous editions of *Trends in Northwest Giving*, the Bill & Melinda Gates Foundation tops this list, accounting for roughly one-third of total giving to our region.

**Top 10 Funders to the Northwest, 2014**
TRENDS OVER TIME

This analysis examines changes in grantmaking to our six-state region — Alaska, Idaho, Montana, Oregon, Washington and Wyoming — by a subset of 1,387 U.S. foundations and corporate funders that reported grantmaking data for both 2012 and 2014.12

1. **Grantmaking to the Northwest jumped 41% in 2014.** Total dollars to the Northwest increased from $999.6 million in 2012 to $1.4 billion in 2014. Even when excluding our region’s largest funder, the Bill & Melinda Gates Foundation, dollars to our region increased by 13%.13

Change in Giving to the Northwest, 2012 to 2014

- **Northwest with Gates:** $414.3M, +41%
- **Northwest without Gates:** $102.7M, +13%
- **National:** $4.2B, +24%
Grantmaking by family and community foundations is on the rise.

As Northwest philanthropy completed its recovery from the Great Recession between 2012 and 2014, funding to our region increased dramatically from family foundations, driven by a $311.6 million increase from the Bill & Melinda Gates Foundation, and from community foundations, led by a $15.6 million increase from The Oregon Community Foundation.

Health funding grew fastest, followed by public affairs and education.

Grant funding for health-related activities more than doubled between 2012 and 2014, fueled by the Bill & Melinda Gates Foundation’s rising support of Washington-based organizations focused on improving global health. Even when excluding the Gates Foundation, however, funding for health still increased by a significant 18%.

Funding for education, consistently a major priority for Northwest philanthropy, rose 32% between 2012 and 2014. Within this issue area, adult education, vocational education and higher education saw the fastest rate of growth.

Increased funding for public affairs, still a relatively small issue area but likely to continue growing as more foundations explore public policy and advocacy efforts, included a $10,000 award from Pride Foundation to Gender Justice League to support transgender activists and allies in Washington state.
Change in Giving to the Northwest by Issue Area, 2012 to 2014

Health: 116% increase of $302.1M
Public Affairs: 59% increase of $5.8M
Education: 31% increase of $49.8M
Agriculture, Fishing & Forestry: 30% increase of $2.7M
Religion: 15% increase of $1.8M
Human Services: 11% increase of $10.3M
Sports & Recreation: 7% increase of $1.3M
Arts & Culture: 5% increase of $2.7M
Community & Economic Development: 4% increase of $1.7M
Environment & Animals: -2% decrease of $1.5M
Philanthropy & Nonprofit Management: -3% decrease of $979K
Human Rights: -23% decrease of $5.5M
Information & Communications: -45% decrease of $6.6M
Among the 1,387 funders that reported their Northwest grantmaking data for both 2012 and 2014, significant increases were reported for both support types, ranking them third and second for grant dollars to our region in 2014. This reflected an increase in dollar amounts allocated for capacity-building and technical assistance, despite a 22% decrease in the number of grants; for research and evaluation, the number of grants remained nearly the same, with the increase in dollars awarded making up the difference.

Program development, the support type that received the most funding in 2014, had a 56% increase. The relatively small increase of funding to policy, advocacy and systems reform, followed by general support, is likely to continue growing as more Northwest funders explore these support types.

Change in Giving to the Northwest by Support Type, 2012 to 2014

- Capacity-Building & Technical Assistance: +205% (+$207M)
- Research & Evaluation: +99% (+$240M)
- Public Engagement & Marketing: +84% (+$11.3M)
- Program Development: +56% (+$255.4M)
- Capital & Infrastructure: +41% (+$37M)
- Policy, Advocacy & Systems Reform: +16% (+$13M)
- General Support: +6% (+$8.3M)
- Network-Building & Collaboration: -8% (-$2M)
- Financial Sustainability: -11% (-$3.6M)
- Leadership & Professional Development: -12% (-$2.3M)
5. Funding for women and girls grew fastest, followed by grants to people of color and other historically underserved communities. We anticipate that these numbers will continue to rise as more foundations incorporate diversity, equity and inclusion lenses into their grantmaking activities.

BY STATE
Grantmaking to Alaska held steady between 2012 and 2014, decreasing by less than 1%. Environment and human services were the top priorities of funders to Alaska, accounting for 17% and 15% of total grant dollars, respectively. The state also attracted significant funding from Lower 48 grantmakers, including $200,000 from the Campion Foundation to Trout Unlimited Alaska to protect the Tongass watershed and Bristol Bay watershed from large-scale mining.

Compared to overall giving to the Northwest, Alaska grantees benefited from a larger share of funding for arts in culture in 2014 (13% to Alaska vs. 5% to the Northwest). In contrast, the proportion of grant dollars to the state was lower for the issue areas of health (14% vs. 38%) and education (7% vs. 19%).

Major grants across issue areas, support strategies and population types included a $740,549 award from Rasmuson Foundation to the City of Bethel for its Yukon-Kuskokwim Regional Aquatic Health and Safety Center.
IDAHO

Grantmaking to Idaho grew 13% between 2012 and 2014. Education and human services were top priority areas, capturing a combined 50% of grant dollars to the state. One-third of grant dollars awarded to Idaho for human services can be attributed to a $4 million grant from the J. A. & Kathryn Albertson Foundation — the top grantmaker both in and to the state — to the Boise-based Treasure Valley Family YMCA.

Compared to overall giving to the Northwest, Idaho grantees benefited from a notably larger share of funding for sports and recreation in 2014 (9% to Idaho vs. 2% to the Northwest), including a $79,119 grant from the Idaho Community Foundation in support of the John Jackson Rock Climbing team.

- Total giving by 613 funders to 1,074 organizations: $71.4 million
- Median grant: $5,000
- Number of grants: 2,731
- Change in giving between 2012 and 2014: +13%
Grantmaking to Montana jumped 61%, the largest increase among the six Northwest states, between 2012 and 2014. Education was the top priority for funders to Montana, receiving nearly one-fifth of all funding, led by a $7 million grant from the Dennis & Phyllis Washington Foundation to the University of Montana Foundation in Missoula. Environment and animals, a close second issue area by total dollar amount, received the largest number of grants (905).

Compared to overall giving to the Northwest, Montana grantees received a far greater proportion of grant dollars for the environment (19% to Montana vs. 7% to the Northwest), including a $40,000 grant from the Montana Community Foundation to the Big Blackfoot Chapter of Trout Unlimited for stream restoration. Montana organizations also received a greater proportion of funding towards public affairs compared to the overall Northwest region (4% vs. 1%).

- Total giving by 823 funders to 1,624 organizations: $94.3 million
- Median grant: $5,000
- Number of grants: 4,484
- Change in giving between 2012 and 2014: +61%

Top 10 Grantmakers to Montana, 2014
1. Dennis & Phyllis Washington Foundation (MT)
2. The Leona M. & Harry B. Helmsley Charitable Trust (NY)
3. Gilhousen Family Foundation (MT)
4. Schwab Charitable Fund (CA)
5. Montana Community Foundation (MT)
6. M.J. Murdock Charitable Trust (WA)
7. The William & Flora Hewlett Foundation (CA)
8. The Bair Ranch Foundation (MT)
9. Gianforte Family Charitable Trust (MT)
10. Oro y Plata Foundation (MT)
Grantmaking to Oregon rose 21% between 2012 and 2014.
Echoing overall giving to the Northwest, health and education were the top priorities for funders to Oregon, accounting for 30% and 21% of total grant dollars, respectively.27 Despite the large share of grant dollars targeting health, a substantially greater share of the number of grants awarded to Oregon-based organizations supported education (20%) and human services (19%) — including a $500,000 award from Meyer Memorial Trust to Oregon Food Bank — followed by 10% for health.

In addition to significant grants for local communities, including a $5 million grant from The Ford Family Foundation to Oregon Health & Science University Foundation for rural outreach and a patient and family housing center, the state received the highest proportion of international relations grants across the Northwest, including NIKE Foundation’s support for Portland-based Mercy Corps’ work with girls in developing countries.

- Total giving by 1,575 funders to 3,240 organizations: $429 million
- Median grant: $6,055
- Number of grants: 16,803
- Change in giving between 2012 and 2014: ▲+ 21%
Grantmaking to Washington grew 60% between 2012 and 2014, driven largely by major health and education gifts from the Bill and Melinda Gates Foundation. The largest single gift to the Northwest region was the Gates Foundation’s $156 million grant to Seattle-based PATH to accelerate development of malaria vaccines. Seattle Foundation also made significant grants for health and education, including $1 million to the Fred Hutchinson Cancer Research Center and $20,000 to the Snohomish County Chapter of American Red Cross in the wake of the Oso mudslide.

Other top priorities for funders to Washington included human services (11%), reflected in a $700,000 grant from The Boeing Company to the United Way of King County. Compared to overall giving to the Northwest, Washington grantees received smaller proportions of grant dollars for environment and animals (3.7% to Washington vs. 7% to the Northwest).

- Total giving by 2,046 funders to 4,856 organizations: $1 billion
- Median grant: $5,000
- Number of grants: 19,267
- Change in giving between 2012 and 2014: +60%

### Top 10 Grantmakers to Washington, 2014

1. Bill & Melinda Gates Foundation (WA)
2. Seattle Foundation (WA)
3. Microsoft Corporation (WA)
4. United Way of King County (WA)
5. The Boeing Company (IL)
6. Washington Research Foundation (WA)
7. Schwab Charitable Fund (CA)
8. Bloomberg Philanthropies (NY)
9. The Norcliffe Foundation (WA)
10. M.J. Murdock Charitable Trust (WA)
Grantmaking to Wyoming rose 30% between 2012 and 2014. The environment (22%), education (21%), and health (12%) were top priorities for funders to Wyoming and combined, constituted over half of all giving to the state.

Compared to overall giving to the Northwest, Wyoming grantees benefited from a notably larger share of funding for arts and culture (11% to Wyoming vs. 4% to the Northwest) and for philanthropy and nonprofit management (10% vs. 2%). More than 80% of the philanthropy and nonprofit management grants to Wyoming, totaling $44.5 million, were to the Community Foundation of Jackson Hole for general support. In turn, the community foundation’s 2014 grants included $254,818 to the Grand Teton National Park Foundation in support of its wildlife research and protection efforts, youth engagement programs and trail restoration projects.

- Total giving by 515 funders to 632 organizations: $57.0 million
- Median grant: $5,000
- Number of grants: 2,187
- Change in giving between 2012 and 2014: ▲+ 30%
**METHODOLOGY**

This report is based on data collected by or directly reported to Foundation Center by December 31, 2016. Findings are based on analysis of two closely-related datasets:

- Analysis of Fiscal Year 2014 philanthropic giving to the Northwest is based on 46,965 reported grants totaling $1.8 billion awarded by a sample of 4,092 funders awarding at least one grant of $1,000 or more to Philanthropy Northwest’s six-state region — Alaska, Idaho, Montana, Oregon, Washington and Wyoming. Of these participating funders, 1,097 are based in the Northwest and 2,995 are based outside the region.

- Analysis of changes in philanthropic giving to the Northwest between Fiscal Year 2012 and Fiscal Year 2014 is based on a subset of 1,387 funders that reported grantmaking data for both years, totaling $1.4 billion in 2014. Of this matched set of funders, 390 are based in the Northwest and 997 are based outside of the region.

Dollar amounts may represent the full authorized grant award or the amount paid in that year, depending on how the foundation reports its activity. Similarly, Fiscal Year 2014 and Fiscal Year 2012 may include grants awarded in late 2013 and late 2011, respectively, depending on how the foundation defines its fiscal calendar. Percentages are rounded to the nearest whole number, leading to some pie charts reflecting slightly more than 100% totals. Dollar amounts are rounded to the tenth place.

**What’s included in the dataset?**

- Grants of $1,000 or more
- Grants approved for future distribution (e.g., multi-year grants in award year)
- Independent foundations and operating foundations
- Corporate direct giving programs and corporate foundations
- Community foundations, including discretionary grants and donor-advised grants when provided by the foundation
- Grantmaking public charities
- Total grantmaking by The Boeing Company, Microsoft Corporation and The Oregon Community Foundation

**What’s not included?**

- Government funding
- In-kind donations
- Grants or scholarships less than $1,000
- Direct employee cash contributions
- Mission investments
- Program-related expenses and other non-grant related expenses that count towards foundation payout rates
- Grants by award size, issue area, support type and population type from Boeing, Microsoft and The Oregon Community Foundation

Endnotes

1 2014 refers to Fiscal Year 2014, which is the most current set of giving data available at time of publication.
2 Gates Foundation support to our region includes grants to Northwest institutions working on global issues, such as PATH.
3 Based on companies that reported their grantmaking to Foundation Center, which does not collect data on corporate giving outside the foundation model.
4 Includes grants reported by the Employees Community Fund of Boeing Puget Sound, a fund managed by trustees elected by Boeing employees.
5 Does not include total grantmaking from The Boeing Company, Microsoft Corporation and The Oregon Community Foundation.
6 Includes 152 awards between $1 million and $5 million, 13 awards between $5 million and $10 million, and 11 awards for more than $10 million.
7 Based on Foundation Center analysis of grants made by this dataset’s 4,092 funders to U.S. recipients outside Alaska, Idaho, Montana, Oregon, Washington and Wyoming.
8 Grants may be categorized for more than one support type, and therefore counted more than once in this section.
9 Alaska Community Foundation did not report its grants for this analysis; this example was collected separately by Philanthropy Northwest.
10 Grants may be categorized for more than one population type, and therefore counted more than once in this section.
11 Includes grants reported by the Employees Community Fund of Boeing Puget Sound, a fund managed by trustees elected by Boeing employees.
12 2012 and 2014 refer to Fiscal Year 2012 and Fiscal Year 2014, which is the most current set of comparison data available.
13 We periodically exclude Gates Foundation grants from our analysis, to demonstrate their significant impact on our data.
14 Excluding Gates Foundation grants, health funding to the Northwest grew from $110.7 million in 2012 to $130.1 million in 2014.
15 Based on interest expressed by Philanthropy Northwest members and partners.
16 Includes a $282.8 million increase from the Gates Foundation.
17 Grants may be categorized for more than one support type, and therefore counted more than once in this section.
18 In 2012, 721 capacity-building and technical assistance grants totaled $100.7 million; in 2014, 565 grants for this support type totaled $307.7 million.
19 In 2012, 604 research and evaluation grants totaled $243 million; in 2014, 603 grants for this support type totaled $483.1 million.
20 Based on interest expressed by Philanthropy Northwest members and partners.
21 Grants may be categorized for more than one population type, and therefore counted more than once in this section.
22 Based on interest expressed by Philanthropy Northwest members and partners.
23 Based on funders that reported their grantmaking to Foundation Center, which does not include Alaska Native Regional Corporations and Alaska’s community foundations; Mat-Su Health Foundation’s grants were reported under the name Valley Hospital Association.
24 Based on Alaska grants from 1,387 funders that submitted data to Foundation Center for both years.
25 Based on Idaho grants from 1,387 funders that submitted data to Foundation Center for both years.
26 Based on Montana grants from 1,387 funders that submitted data to Foundation Center for both years.
27 Based on partial reporting from The Oregon Community Foundation.
28 Based on Oregon grants from 1,387 funders that submitted data to Foundation Center for both years.
29 Includes grants reported by the Employees Community Fund of Boeing Puget Sound, a fund managed by trustees elected by Boeing employees.
30 Based on Washington grants from 1,387 funders that submitted data to Foundation Center for both years.
31 Based on Wyoming grants from 1,387 funders that submitted data to Foundation Center for both years.
